📍 Kanpur, India

PROJECTS

Crypto Tracker

React.js, HTML, CSS, Framer-Motion, React-router, MUI

Github

Demo

- Developed with cutting-edge technologies including React, Material-UI (MUI), Chart.js, and Framer Motion, Crypto Tracker stands as a sophisticated project tailored for seamless cryptocurrency monitoring. This dynamic platform offers a myriad of features aimed at optimizing user experience and data management within the realm of cryptocurrency tracking.
- Filters, Sorting, Currency Filter:** Implemented robust navigation features enabling users to efficiently sift through vast amounts of data while customizing their viewing experience with currency filters, sorting options, and streamlined data handling mechanisms.
- Days Data, Dynamic Charts:** Leveraged real-time data to provide users with up-to-date insights into cryptocurrency trends through dynamic charting capabilities, ensuring accurate and timely analysis.
- Comparison:** Facilitated side-by-side comparison of coins, enabling users to discern performance differentials and make informed investment choices.

Go Bhukkad

React, Tailwind CSS, JavaScript, Redux

Github

Demo

- Ensures an optimal viewing experience across various devices and screen sizes with Tailwind CSS.
- Cart functionality is implemented for adding dishes to cart for order.
- Utilizes ReduxJS is used for efficient state management
- implemented search function for user to filter menu

TECHNICAL SKILLS

programming skills:

javascript, html, css

framework :

React, Tailwind, Bootstrap, Redux, Jest, Parcel

Software/Version Control:

Git and GitHub, VSCode, IntelliJ, Netbeans.

Operating System:

Windows

EXTRACURRICULAR

- Competed in various scientific challenges, demonstrating strong analytical and problem-solving skills.
- Collaborated with team members to conduct experiments and present findings.

AREA OF INTEREST

Programming

Listening music

Reading books

Badminton
